

### Tablecloth/Napkin Chart:

Here is a chart to show you how many, and what size napkins come with the tablecloths. Unless otherwise stated, this will be the case. It will also show you how many people would normally sit at this size table, and what the approximate measurement of each tablecloth will actually be. Please e-mail with your actual table size before ordering, or include your table size when placing your order. We will measure tablecloths individually to make sure that you are getting the right size for your table.
